WORK EXPERIENCE

Printing Shop Manager

NodeTech Internet and Printing Services

11/2017 - 10/2021

Company's Role and Personal Perspective I Developed:

- Manage the store sales and improvements.
- Regularly usage of photoshop to edit pictures for customers such as passport size, 2x2, 1x1, etc.
- Used Adobe Illustrator for designing banner, flyers, calling cards and more.
- Works on Microsoft office apps such as Word, Excel, PowerPoint.
- Repair skills on computer basic problems, installing software and printer troubleshooting.
- Friendly in managing customers needs with a calm response when dealing with rude customers or unsatisfied with our service.
- Detailed-oriented to every customer's needs and gives little personal advice to help improve or clarify their goals.
- Not difficult to work with co-workers or higher managers and open-minded to new suggestions or every decision approved.
- Always trying to improve myself, whether in technical skills or work and positive mindset towards my surroundings or with my loved ones.
- Daily learning mindset with health nutrition balance and think ways to help company to solve problems and improvements.

EDUCATION

BS in Information Technology

Liceo de Cagayan de Oro City

06/2012 - 05/2014

2 years - Undergraduate

TECHNICAL SKILLS

PERSONAL PROJECTS

Gerald Chat App

- A simple chat application which lets you send and receive messages instantly, it can store the latest conversation with other users, search a user with our search input and have a conversation when we select the user and instantly display on our chat panel all the conversation with the user selected.

Gerald's Pizza App

- Online pizza shop gives costumer to just tap on their phone or pc to order, this project provides lists of pizza and its feature with their prices. We can order and select the product we like with additional toppings and sizes of the pizza.

GeraldSocial App

- A facebook like application that uses some of the facebook features like post an image, sharing and liking a post functionality which makes this project simple to use. This project focuses on the CRUD functionality using Mysql in storing data like posts, likes, share, comments and relationships with users.

Gerald Store App

- GeraldStore app is an e-commerce app that sale clothing and other products, this application concept is the same with any other e-commerce app like features such as image slider on our main page, sorting the product from men, women, etc., sort price to the lowest price available and many more.
